the choice for X Series owners

X Accessories

M Mount Adapter

The M Mount adapter lets you use an incredibly wide selection of lenses with an X Mount-equipped camera body. Made from the same high-grade metal material used in X Mount cameras and the XF lens X Mount, the adapter is engineered to ensure a high-precision fit. It also features electronic contacts for communicating signals with the camera body and a function button that lets users smoothly choose settings and functions for the mounted lens (Shoot Without Lens, focal length settings, various image corrections, etc.) *1 Also in the case of the X-Pro1, the bright frame in the Optical Viewfinder mode changes according to the lens focal length setting for easy shooting.*2

*1 X-Pro1 requires firmware version 1.11 or higher.
*2 The bright frame may not be displayed for lenses with certain focal lengths.

Compatible with:
X-Pro1/X-T1/X-T10/X-E2/X-E1/X-M1/X-A2

Macro Extension Tube

Fits between camera body and interchangeable lens to enable macro photography at a higher magnification ratio. Available in 11mm and 16mm, depending on the level of magnification required.

Shoe Mount Flash

EF-X20

A compact and stylish hot-shoe flash, powered with two AAA batteries, with an easy-to-use dial to control output. The design features extensive use of metal in the exterior casing to give an added premium feel.

Compatible with: X-Pro1/X-T1/X-T10/X-E2/X-E1/X-M1/X-A2/X100S/X100/X20/X10/X-1/FinePix HS50EXR/HS30EXR/HS20EXR/S1/SL1000/SL300/X100T/X30

EF-42

Tilt angle: 90°. Swivel angle: 180° (Left) and 120° (Right).
Requires 4xAAA batteries.

Compatible with: X-Pro1/X-T1/X-T10/X-E2/X-E1/X-M1/X-A2/X100S/X100/X20/X10/XS1/FinePixHS50EXR/HS30EXR/HS20EXR/S1/SL1000/SL300/X100T/ X30

EF-20

Tilt angle: 90°
Requires 2xAAA batteries.

Compatible with: X-Pro1/X-T1/X-T10/X-E2/X-E1/X-M1/X-A2/X100S/X100/X20/X10/X-S1/FinePix/S50EXR/HS30EXR/HS20EXR/S1/SL1000/X100T/X30

RR-90

Stereo Microphone

MIC-ST1

Allows users to set the microphone level while checking the level meter on the camera. It features a 2.5mm jack, and can be fitted with a conversion adapter to connect to supported X Series models.* The included adapter is required to convert the terminal for camera connection.

Compatible with: X-T1/X-T10/X-E2/X-E1/X100S*/X20*/X-S1*/FinePix HS50EXR/X100T/X30

Hand Grip

VG-XT1

Compatible with: X-T1

This grip has the same dust- and splash-resistant structure as the cameras in X-T1 series. It features a shutter release button, AE-L / AF-L and focus assist buttons, as well as twin command dials for excellent operability when you hold the camera vertically. The tripod mounting socket at the base of the grip is aligned with the optical axis. It houses an auxiliary battery (NP-W126) to enable the shooting of approx. 700 shots on a single charge when combined with the camera body battery.

HG-XM1

Offering an assured hold while preventing any interference with a tripod head, this grip is ideal when the camera is fitted with a large lens. The tripod mounting socket is aligned with the optical axis and both battery and memory card can be accessed while the grip is in place.

Compatible with: X-M1/X-A2

GB-001

This grip strap gives a more assured hold when fitted to a camera body. It can be combined with a hand grip to achieve an even higher level of stability.

Compatible with: X-T1/X-T10/X-E2/X-E1/X-M1/X-A2/X-S1/X100S/X100/FinePix HS50EXR

MHG-XT Large/Std/Small

Compatible with: X-T1

MHG-XPRO

Compatible with: X-Pro1

MHG-XE

Compatible with: X-E2/X-E1

MHG-XT10

Compatible with: X-T10

These grips feature a 38mm-wide quick release plate that can be directly fitted to compatible tripod mounts. The tripod mounting socket is aligned with the optical axis, plus the battery and memory card can be changed while the grip is mounted to the camera. The MHG-XT, which is designed for the X-T1, is available in three different shapes.

Leather Case

BLC-XT1

This half case, specifically designed for the X-T1, is made of genuine leather for a luxury feel. Users can access the SD card and battery without removing the camera from the case. It comes with a shoulder strap, also made of leather, and a wrapping cloth to cover your camera when putting it in a bag.

Compatible with: X-T1

LC-XPro1

This half case, specifically designed for the X-Pro1, is made from genuine leather for a luxury feel.

Compatible with: X-Pro1

BLC-XE1

This half case, specifically designed for the X-E1 / X-E2, is made from genuine leather for a luxury feel and has a contoured grip for a solid hold. Users can access the SD card and battery without removing the camera from the case, which comes supplied with a wrapping cloth for the camera.

Compatible with: X-E2/X-E1

BLC-XM1/BLC-XT10

This half case, specifically designed for the X-M1/ X-T10, is made of genuine leather for a luxury feel. Users can access the SD card and battery, or mount the camera on a tripod without removing the camera from the case.

Compatible with: X-M1/X-A2

Compatible with: X-T10

Protector Filter

A clear protection filter with a transmittance rate of over 99.7%. The thin, multi-layer Super EBC coating protects the lens surface without compromising its colour reproduction performance.

Tethered Shooting Software

HS-V5 for Windows® Ver.1.1

Advanced software for tethered shooting with an X-T1 or X-T1 Graphite Silver Edition. Once attached, users can control the camera with the computer, and save images direct to the hard drive. USB2.0*2 is supported for the connectivity between the camera and the computer.

*1

Must be updated to the tethering-compatible firmware (Ver. 3.0 or later). Internet connection is required for downloading compatible firmware.

*2

A USB2.0 MicroB cable must be used for USB connection between the camera and computer.

"HS-V5 for Windows® Ver.1.0" is a tethering software that allows users to connect X-T1* and X-T1 Graphite Silver Edition* to PC to directly save captured images onto PC or control the cameras from computer. The use of USB2.0 cable** is supported for connection between the camera and PC.
